

iTrek Orthotic Solutions: On-Site Results.

Features and Benefits

On-Site Professional Foot Orthotic Evaluation and Delivery

iTrek Orthotic Solutions is an innovative provider of on-site professional foot orthotic evaluation services. Unlike traditional orthotic providers that require patients to visit external clinics, iTrek brings clinical expertise directly to workplaces, facilities, offices, and clinics. This mobile model streamlines the process of assessment, design, and delivery of custom and quality prefabricated foot orthotics, making it highly convenient for organizations and individuals seeking foot health solutions without leaving their work location.

iTrek Orthotic Solutions was established by Greg Storz, CO. Greg is a Certified Orthotist with over 30 years of experience in the orthotics and prosthetics profession. iTrek and Greg are fully committed to providing the most accessible, efficient and effective orthotic and footwear services customized to you and your organization's needs.

Key Features

- **On-Site Service:** iTrek's team of professionals travels to the your location—be it a workplace, medical facility, office, or clinic—eliminating the need for off-site appointments.
- **Clinical Assessment:** Comprehensive foot evaluations are conducted by certified specialists using advanced technology.
- **Fusion 3D Printed Orthotics:** Custom orthotics are designed and fabricated using state-of-the-art 3D printing technology, ensuring precise fit and optimal comfort.
- iTrek utilizes the Materialise Motion digital gait, stance, and balance assessment system to analyze foot biomechanics and specific foot conditions. This digital platform provides accurate data for the creation of highly personalized orthotic solutions.
- A diverse range of quality, well-designed prefabricated orthotic solutions; including Krotos Power Step Carbon Fiber and Comfort Support lines.
- **Rapid Delivery & follow up:** After assessment & design, provided on-site or at Young Chiropractic Rehabilitation in La Vista and Bennington.

Benefits

- **Convenience:** Clients can receive professional foot care and custom orthotics without disrupting their daily routines or workflow, as services are provided at their location.
- **Enhanced Accuracy:** The use of the Materialise Motion Phits system enables precise evaluation of gait, stance, and balance, leading to better-fitting and more effective orthotics.
- **Time Efficiency:** On-site services save time for both employees and organizations, reducing time lost to travel and external appointments.
- **Workplace Wellness:** Offering foot health solutions on-site supports occupational health initiatives, potentially reducing discomfort, fatigue, and injury among staff.
- **Customization:** Fusion 3D printing technology allows for the creation of orthotics tailored to each individual's unique biomechanics, enhancing comfort and support.
- **Comprehensive Care:** The combination of professional assessment, advanced analytics, and cutting-edge fabrication ensures that clients receive holistic and effective foot care.

Conclusion

iTrek Orthotic Solutions reimagines the traditional orthotic service delivery by prioritizing convenience, technological advancement, and personalized care. By bringing expert evaluation and custom orthotic delivery directly to workplaces and facilities, iTrek empowers organizations to enhance employee wellness and productivity while ensuring individuals benefit from the latest innovations in foot health.
